FUND SUMMARY

INVESTMENT OBJECTIVE

The AdvisorShares Pacific Asset Enhanced Floating Rate ETF (the “Fund”) seeks to provide a high level of current income.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Most investors will incur customary brokerage commissions when buying or selling shares of the Fund, which are not reflected in the table below.

SHAREHOLDER FEES <i>(fees paid directly from your investment)</i>	None
ANNUAL FUND OPERATING EXPENSES <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
MANAGEMENT FEES	0.95%
DISTRIBUTION (12b-1) FEES	0.00%
OTHER EXPENSES	0.67%
ACQUIRED FUND FEES AND EXPENSES ^(a)	0.04%
TOTAL ANNUAL OPERATING EXPENSES	1.66%
FEE WAIVER/EXPENSE REIMBURSEMENT ^(b)	-0.52%
TOTAL ANNUAL OPERATING EXPENSES AFTER FEE WAIVER / EXPENSE REIMBURSEMENT	1.14%

(a) *Total Annual Operating Expenses and Total Annual Operating Expenses After Fee Waiver/Expense Reimbursement in this fee table may not correlate to the expense ratios in the Fund’s financial highlights (and the Fund’s financial statements) because the financial highlights include only the Fund’s direct operating expenses and do not include Acquired Fund Fees and Expenses, which represent the Fund’s pro rata share of the fees and expenses of the exchange-traded funds in which it invests.*

(b) *AdvisorShares Investments, LLC (the “Advisor”) has contractually agreed to waive its fees and/or reimburse expenses to keep net expenses (excluding amounts payable pursuant to a Rule 12b-1 plan, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures that are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 1.10% of the Fund’s average daily net assets for at least one year from the date of this Prospectus. The expense limitation agreement may be terminated without payment of any penalty (i) by the Trust for any reason and at any time and (ii) by the Advisor, for any reason, upon ninety (90) days’ prior written notice to the Trust, such termination to be effective as of the close of business on the last day of the then-current one-year period. If it becomes unnecessary for the Advisor to waive fees or reimburse expenses, the Trust’s Board of Trustees may permit the Advisor to retain the difference between the Fund’s total annual operating expenses and the expense limitation currently in effect, or, if lower, the expense limitation that was in effect at the time of the waiver and/or reimbursement, to recapture all or a portion of its prior fee waivers or expense reimbursements made during the immediately preceding three-year period.*

EXAMPLE

This Example is intended to help you compare the cost of investing in the shares of the Fund with the cost of investing in other funds. This Example does not take into account creation or redemption

transaction fees, or the brokerage commissions that you pay when purchasing or selling shares of the Fund. If these fees and commissions were included, your costs would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
AdvisorShares Pacific Asset Enhanced Floating Rate ETF	\$116	\$472	\$852	\$1,920

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Operating Expenses or in the Example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s shares. During the most recent fiscal year ended June 30, 2018, the Fund’s portfolio turnover rate was 73% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”). Pacific Asset Management (the “Sub-Advisor”) seeks to achieve the Fund’s investment objective by selecting a focused portfolio comprised primarily of income producing floating rate loans and floating rate debt securities.

Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in floating rate loans and other floating rate debt securities and in derivatives or other instruments that have economic characteristics similar to such securities (such as swap agreements, including, but not limited to, total return swaps, credit default swaps, and interest rate swaps). The Fund is expected to invest primarily in loans and other securities that are rated below investment grade (*i.e.*, high yield securities, sometimes called “junk bonds” or non-investment grade securities) or, if unrated, of comparable quality as determined by the Sub-Advisor.

Floating rate loans and floating rate debt securities are those with interest rates which float, adjust or vary periodically based upon a benchmark indicator, a specified adjustment schedule, or prevailing interest rates. Floating rate loans and floating rate debt securities in which the Fund invests consist of senior secured floating rate loans and floating rate debt securities of domestic and U.S. dollar denominated foreign issuers. Senior floating rate loans and some floating rate debt securities are debt instruments that may have a right to payment that is senior to most other debts of the borrowers. Borrowers may include corporations, partnerships and other entities that operate in a variety of industries and geographic regions. Generally, secured floating rate loans are secured by specific assets of the borrower.

The Fund may invest up to 20% of its assets in certain other types of debt instruments or securities including senior unsecured floating rate loans and secured and unsecured second lien floating rate loans. Second lien loans generally are second in line behind senior loans in terms of prepayment priority with respect to pledged collateral.

The Sub-Advisor determines the target risk and investable universe, then constructs what it believes to be the most effective mix of investments in accordance with the overall portfolio guidelines. To seek an increase in yield, the Fund expects to employ leverage to enhance potential return. The timing and terms of leverage will be determined by the Sub-Advisor's ETF Investment Committee. The Fund may use leverage by borrowing money, normally on a floating rate basis, or through swap agreements. An investment is generally sold when it no longer offers relative value or an adverse change in corporate or sector fundamentals has occurred.

On a day-to-day basis, the Fund may hold money market instruments, cash, other cash equivalents, and exchange traded products ("ETPs") that invest in these and other highly liquid instruments.

PRINCIPAL RISKS OF INVESTING IN THE FUND

The Fund is subject to a number of risks, as described below, that may affect the value of its shares, including the possible loss of money. As with any fund, there is no guarantee that the Fund will achieve its investment objective.

Counterparty Risk. The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. The Fund's use of such financial instruments, including swap agreements and structured notes, involves risks that are different from those associated with ordinary portfolio securities transactions. For example, if a swap agreement counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease.

Credit Risk. The Fund could lose money if the issuer or guarantor of a debt instrument in which the Fund invests becomes unwilling or unable to make timely principal and/or interest payments or to otherwise meet its obligations. Credit risk is heightened to the extent the Fund invests in high yield securities.

Derivatives Risk. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed the Fund's original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset (such as stock, bond or currency), a physical asset (such as gold), or a market index (such as the S&P 500 Index). Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk. The Fund may enter into swap agreements, including credit default and interest rate swaps, for purposes of attempting to gain exposure to a particular asset without actually purchasing that asset or to hedge a position. Credit default swaps may increase or decrease the Fund's exposure to credit risk and could result in losses if the creditworthiness of the entity on which the credit default swap is based is not correctly evaluated. Swap agreements may also subject the Fund to the risk that the counterparty to the transaction may not meet its obligations.

ETF Market Risk. In stressed market conditions, the market for ETF shares may become less liquid in response to deteriorating liquidity in the markets for the ETF's underlying portfolio holdings. This adverse effect on liquidity for the ETF's shares in turn can lead to differences between the market price of the ETF's shares and the underlying value of those shares.

Exchange-Traded Product Risk. The Fund may invest in certain ETPs. Through its positions in ETPs, the Fund will be subject to the risks associated with such ETP's investments, or reference assets/benchmark components in the case of exchange-traded notes ("ETNs"), including the possibility

that the value of the securities or instruments held by or linked to an ETP could decrease. An ETP's lack of liquidity can result in its value being more volatile than the underlying portfolio investment or reference asset/benchmark component. In addition, certain ETPs may hold common portfolio positions, thereby reducing any diversification benefits.

Floating Rate Loan Risk. Floating rate loans (or bank loans) are usually rated below investment grade. The market for floating rate loans may be subject to irregular trading activity, wide bid/ask spreads, and extended trade settlement periods. Investments in floating rate loans are typically in the form of an assignment or participation. Investors in a loan participation assume the credit risk associated with the borrower and may assume the credit risk associated with an interposed financial intermediary. Accordingly, if a lead lender becomes insolvent or a loan is foreclosed, the Fund could experience delays in receiving payments or suffer a loss. In an assignment, the Fund effectively becomes a lender under the loan agreement with the same rights and obligations as the assigning bank or other financial intermediary. Accordingly, if the loan is foreclosed, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. Due to their lower place in the borrower's capital structure and possible unsecured status, junior loans involve a higher degree of overall risk than senior loans of the same borrower. In addition, the floating rate feature of loans means that floating rate loans will not generally experience capital appreciation in a declining interest rate environment. Declines in interest rates may also increase prepayments of debt obligations and require the Fund to invest assets at lower yields. Floating rate loans generally are subject to extended settlement periods in excess of seven days, which may impair the Fund's ability to sell or realize the full value of its loans in the event of a need to liquidate such loans.

Foreign Investment Risk. The Fund's investments in securities of foreign issuers, including ADRs, may involve certain risks that are greater than those associated with investments in securities of U.S. issuers. These include risks of adverse changes in foreign economic, political, regulatory and other conditions; changes in currency exchange rates or exchange control regulations (including limitations on currency movements and exchanges); differing accounting, auditing, financial reporting and legal standards and practices; differing securities market structures; and higher transaction costs. In addition, the securities of some foreign companies may be less liquid and, at times, more volatile than securities of comparable U.S. companies.

High Yield Securities Risk. The Fund's investments in high yield securities or "junk bonds" are subject to a greater risk of loss of income and principal than higher grade debt securities. The Fund's investment in high yield securities also subjects the Fund to greater levels of interest rate, credit and liquidity risk than funds that do not invest in such securities. Issuers of junk bonds are often highly leveraged and are more vulnerable to changes in the economy. These securities are considered predominately speculative with respect to the issuer's continuing ability to make principal and interest payments.

Illiquid Investments Risk. This risk exists when particular Fund investments are difficult to purchase or sell, which can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Income Risk. The income from the Fund's investments may decline because of falling market interest rates. This can result when the Fund invests the proceeds from new share sales, or from matured or called bonds, at market interest rates that are below the Fund's portfolio current earnings rate.

Interest Rate Risk. Fixed income securities are subject to the risk that securities could lose value because of interest rate changes. Fixed income securities with longer maturities are subject to greater price shifts as a result of interest rate changes than fixed income securities with shorter maturities. Floating or adjustable rate securities (such as most loans) typically have less exposure to interest rate fluctuations

than other fixed income securities and their exposure will generally be limited to the period of time until the interest rate on the security is reset.

Leverage Risk. Leverage is investment exposure that exceeds the initial amount invested. The loss on a leveraged investment may far exceed the Fund's principal amount invested. Leverage may magnify the Fund's gains and losses and, therefore, increase volatility. The use of leverage may result in the Fund having to liquidate holdings when it may not be advantageous to do so.

Loan Participation Risk. The Fund may not have a readily available market for loan participation interests and, in some cases, the Fund may have to dispose of such securities at a substantial discount from face value. Loan participations also involve the credit risk associated with the underlying corporate borrower.

Management Risk. The Sub-Advisor continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor's judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment.

Market Risk. Due to market conditions, the value of the Fund's investments may fluctuate significantly from day to day. Price fluctuations may be temporary or may last for extended periods. This volatility may cause the value of your investment in the Fund to decrease. Because of its link to the markets, an investment in the Fund may be more suitable for long-term investors who can bear the risk of short-term principal fluctuations, which at times may be significant.

Prepayment Risk. The Fund invests in floating rate securities, and may invest in mortgage related securities, each of which, like other debt securities, may be paid off early when the issuer of a debt security can repay the principal prior to a security's maturity. If interest rates are falling, the Fund may have to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

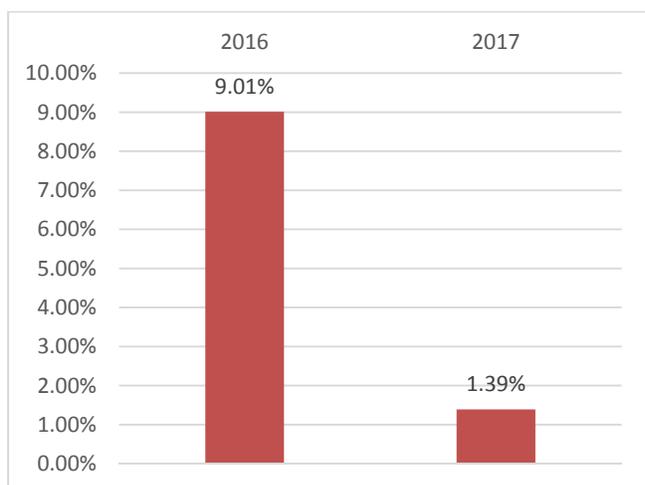

Trading Risk. Shares of the Fund may trade above or below their net asset value ("NAV"). The trading price of the Fund's shares may deviate significantly from their NAV during periods of market volatility and, in such instances, you may pay significantly more or receive significantly less than the underlying value of the Fund's shares. There can be no assurance that an active trading market for the Fund's shares will develop or be maintained. In addition, trading in shares of the Fund may be halted because of market conditions or for reasons that, in the view of the NYSE Arca (the "Exchange"), make trading in shares inadvisable.

FUND PERFORMANCE

The bar chart and table that follow show how the Fund has performed on a calendar year basis and provide an indication of the risks of investing in the Fund. The table shows how the Fund's performance compares to the S&P 500 Index, which is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held common stocks. The table also shows how the Fund's performance compares to the S&P/LSTA U.S. Leveraged Loan 100 Index, which is a designed to track the market-weighted performance of the largest institutional leveraged loans based on market weightings, spreads and interest payments. Both the bar chart and the table assume the reinvestment of all dividends and distributions. Past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Updated performance information is available on the Fund's website at www.advisorshares.com.

Calendar Year Total Returns

The Fund's year-to-date total return as of September 30, 2018 was 3.37%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	2.63%	3Q/2016
Lowest Return	-0.14%	1Q/2017

AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED DECEMBER 31, 2017

ADVISORSHARES PACIFIC ASSET ENHANCED FLOATING RATE ETF	1 Year	Since Inception (2/18/2015)
Return Before Taxes Based on NAV	1.39%	2.78%
Return After Taxes on Distributions	0.00%	1.28%
Return After Taxes on Distributions and Sale of Fund Shares	0.78%	1.43%
S&P 500 Index	21.83%	11.10%
S&P/LSTA U.S. Leveraged Loan 100 Index (reflects no deduction for fees, expenses, or taxes)	3.36%	3.37%

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes on distributions and sale of fund shares may exceed other average annual total returns due to an assumed tax benefit from any losses on a sale of shares at the end of the measurement period.

MANAGEMENT

Name	Title
AdvisorShares Investments, LLC	Advisor

PORTFOLIO MANAGERS

Name and Title	Length of Service with Sub-Advisor
Bob Boyd, Managing Director	since 2012
Michael Marzouk, CFA, Managing Director	Since 2007

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems shares on a continuous basis at NAV only in a large specified number of shares called a “Creation Unit.” The shares of the Fund that trade on the Exchange are “created” at their NAV by market makers, large investors and institutions only in block-size Creation Units of 50,000 shares. A “creator” enters into an authorized participant agreement (“Participant Agreement”) with the Fund’s distributor or uses a Depository Trust Company (“DTC”) participant who has executed a Participant Agreement (an “Authorized Participant”), then receives 50,000 shares of the Fund (or multiples thereof) generally in exchange for a specified amount of cash totaling the NAV of the Creation Unit(s).

Individual Fund shares may only be purchased and sold in secondary market transactions through brokers. The shares of the Fund are listed on the Exchange and, because shares trade at market price rather than at NAV, shares may trade at a value greater than or less than NAV.

TAX INFORMATION

The Fund intends to make distributions that may be taxed as ordinary income or capital gains (or a combination thereof), unless you are investing through a tax-advantaged arrangement such as a 401(k) plan or an individual retirement account (“IRA”), which may be taxed upon withdrawal.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

Investors purchasing shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund, the Advisor or the Sub-Advisor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing broker-dealers or other intermediaries and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

MORE INFORMATION ABOUT THE TRUST AND THE FUND

AdvisorShares Trust (the “Trust”) is a Delaware statutory trust offering a number of professionally managed investment portfolios or funds.

Section 12(d)(1) of the Investment Company Act of 1940 (the “1940 Act”) restricts investments by investment companies in the securities of other investment companies, including shares of the Fund or another ETF. However, under certain circumstances and subject to certain terms and conditions, a registered investment company may invest in other investment companies (“underlying investment companies”) beyond the limits set forth in Section 12(d)(1). In particular, if an underlying investment company has obtained a Section 12(d)(1) exemptive order from the U.S. Securities and Exchange Commission (the “SEC”), the Fund may enter into an agreement with the underlying investment company pursuant to which the Fund may invest in the underlying investment company beyond the Section 12(d)(1) limits subject to the terms and conditions of the underlying investment company’s exemptive order. The Fund may enter into such agreements with certain ETFs to permit the Fund to invest in the ETFs to an unlimited extent.

Creation Units of the Fund generally are issued and redeemed in return for a specified amount of cash totaling the NAV of the Creation Units.

EXCEPT WHEN AGGREGATED IN CREATION UNITS, SHARES OF THE FUND ARE NOT REDEEMABLE SECURITIES.

MORE INFORMATION ABOUT THE FUND’S INVESTMENT OBJECTIVE

The investment objective of the Fund is non-fundamental and may be changed by the Trust’s Board of Trustees (the “Board”) without a shareholder vote.

MORE INFORMATION ABOUT THE FUND’S PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed ETF and, thus, does not seek to replicate the performance of a specified passive index of securities. Instead, it uses an active investment strategy in seeking to meet its investment objective. The Sub-Advisor, subject to the oversight of the Advisor and the Board, has discretion on a daily basis to manage the Fund’s portfolio in accordance with the Fund’s investment objective and investment policies.

The Sub-Advisor seeks to achieve the Fund’s investment objective by selecting a focused portfolio comprised primarily of income producing floating rate loans and floating rate debt securities (commonly referred to as bank loans, leveraged loans or floating rate loans), which consist of senior secured floating rate loans and other floating rate debt securities of domestic and U.S. dollar denominated foreign issuers.

Under normal circumstances, the Fund will generally invest at least 80% of its assets (plus any borrowings for investment purposes) in floating rate loans and floating rate debt securities or in debt securities, derivatives or other instruments that have economic characteristics similar to such securities. Floating rate loans and floating rate debt securities are those with interest rates which float, adjust or vary periodically based upon a benchmark indicator, a specified adjustment schedule, or prevailing interest rates.

Floating rate loans will generally be purchased from banks or other financial institutions through assignments or participations. A direct interest in a floating rate loan may be acquired directly from

the agent of the lender or another lender by assignment or an indirect interest may be acquired as a participation in another lender's portion of a floating rate loan.

In pursuing its investment objective, the Fund seeks to outperform the Credit Suisse Institutional Leveraged Loan Index (the "Index").

Investment Philosophy

The Sub-Advisor believes a disciplined portfolio decision-making process that focuses on credit fundamentals for individual security selection will lead to outstanding long-term performance versus the Fund's peers and benchmark. The Sub-Advisor believes that the focus should be on the fundamentals of the businesses in which the Fund invests.

Selection Process

The Sub-Advisor's selection process starts with a top-down market analysis and is complemented by bottom-up security selection.

Determine Investable Universe of Liquid Loans - The Sub-Advisor begins with a top-down analysis, which provides a framework for the strategy's investable universe. The strategy aims to provide exposure to the most liquid segment of the bank loan marketplace. In general, the investable universe will be comprised of the largest loans in the Index. The factors considered by the Sub-Advisor when determining liquidity specifically for loans may include the frequency of trading or quotes, the number of dealers in the market willing to purchase or sell the loan, trading volume, the nature of the security, and the market for the security including prospects for future demand for the loan.

Top-Down Assessment for Portfolio Leverage - Once the Sub-Advisor has determined the investable universe, both the macro-economic environment and technical factors that could materially impact the credit markets are assessed. The Sub-Advisor assesses the economic and market climates. The Sub-Advisor then determines an overall target of portfolio risk and leverage to employ for the near term.

Portfolio Construction - Once the Sub-Advisor has determined the target risk and investable universe, the Sub-Advisor constructs what is believed to be the most effective mix of investments in accordance with the overall portfolio guidelines. As a result, investments with the most favorable risk/reward analyses will tend to have a greater representation or leverage in the Fund's portfolio. Due to the nature of ETF structure and liquidity requirements, the portfolio will place a higher value on liquidity relative to products without such a requirement. The portfolio will be diversified by industry and issuer, with no individual issuer representing more than 5% of the portfolio. The typical duration positioning will be between 0.25 years to 0.75 years or as determined by the Sub-Advisor.

Monitor - Once an investment is made, monitoring takes place each business day. Portfolio values are monitored through daily third-party pricing. Credit updates are captured through the Sub-Advisor's research system. This system serves as a centralized credit hub for the Sub-Advisor's research team. The system aggregates information such as portfolio holdings, outlooks, analyst comments, and investment theses for the portfolio management, operations, and credit teams. Investments are sold based upon relative value opportunities or changes in corporate fundamentals.

A Note on Leverage

The Fund may use leverage by borrowing money, normally on a floating rate basis. The Sub-Advisor's ETF Investment Committee (the "Committee") formally meets on a regular basis to review and assess leverage terms and leverage amounts. The Committee seeks to use leverage for the purposes of making additional investments only if its members believe that, at the time of using leverage, the total return on the assets purchased with such funds will exceed interest payments and other costs on the leverage. The Fund may obtain investment exposure in excess of its assets in seeking to achieve its investment objective. The use of leverage for investment purposes increases both investment opportunity and investment risk.

MORE INFORMATION ABOUT THE PRINCIPAL RISKS OF INVESTING IN THE FUND

The Fund is subject to a number of risks that may affect the value of its shares. This section provides additional information about the Fund's principal risks. The degree to which a risk applies to the Fund varies according to its investment allocation. Each investor should review the complete description of the principal risks before investing in the Fund. As with investing in other securities whose prices increase and decrease in market value, you may lose money by investing in the Fund.

Counterparty Risk. The Fund may invest in financial instruments involving counterparties for the purpose of attempting to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. Such financial instruments may include, among others, total return, index, interest rate, and credit default swap agreements. The use of swap agreements and similar instruments exposes the Fund to risks that are different than those associated with ordinary portfolio securities transactions. For example, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease. In addition, the Fund may enter into swap agreements with a limited number of counterparties, which may increase the Fund's exposure to counterparty credit risk. Similarly, if the credit quality of an issuer or guarantor of a debt instrument improves, this change may adversely affect the value of the Fund's investment.

Credit Risk. Credit risk is the risk that the Fund could lose money if an issuer or guarantor of a debt instrument becomes unwilling or unable to make timely principal and/or interest payments, or to otherwise meet its obligations. The Fund is also subject to the risk that its investment in a debt instrument could decline because of concerns about the issuer's credit quality or perceived financial condition. Fixed income securities are subject to varying degrees of credit risk, which are sometimes reflected in credit ratings.

Derivatives Risk. The Fund may invest in derivatives to gain market exposure, enhance returns or hedge against market declines. Examples of derivatives are options, futures, options on futures and swaps. The Fund's use of derivative instruments involves risks different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) the risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. These risks could cause the Fund to lose more than the principal amount invested. In addition, investments in derivatives may involve leverage, which means a small percentage of assets invested in derivatives can have a disproportionately larger impact on the Fund.

ETF Market Risk. In stressed market conditions, the market for ETF shares may become less liquid in response to deteriorating liquidity in the markets for the ETF's underlying portfolio holdings. This adverse effect on liquidity for the ETF's shares in turn can lead to differences between the market price of the ETF's shares and the underlying value of those shares.

Exchange-Traded Product Risk. The Fund may invest in certain ETPs. Through its positions in ETPs, the Fund generally will be subject to the risks associated with such vehicle's investments, or reference assets/benchmark components in the case of ETNs, including the possibility that the value of the securities or instruments held by or linked to an ETP could decrease. Certain of the ETPs may hold common portfolio positions, thereby reducing any diversification benefits. The ETPs in which the Fund invests are pooled investment vehicles that are not registered pursuant to the 1940 Act and, therefore, are not subject to the regulatory scheme of the 1940 Act including the investor protections afforded by the

1940 Act. Under normal market conditions, the Fund will purchase shares of or interest in ETPs in the secondary market. When the Fund invests in an ETP (except an ETN), in addition to directly bearing the expenses associated with its own operations, it also will bear a pro rata portion of the ETP's expenses (including operating costs and management fees). Because ETNs are debt securities and not pools of securities, the Fund pays a specific investor fee for its investments in ETNs. Consequently, an investment in the Fund entails more direct and indirect expenses than a direct investment in an ETP.

Floating Rate Loan Risk. Floating rate loans (or bank loans) are usually rated below investment grade. The market for floating rate loans may be subject to irregular trading activity, wide bid/ask spreads, and extended trade settlement periods. The Fund's investment in loans may take the form of a participation or an assignment. Loan participations typically represent direct participation in a loan to a borrower, and generally are offered by financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, the Fund assumes the credit risk associated with the borrower and may assume the credit risk associated with an interposed financial intermediary. If the lead lender in a typical lending syndicate becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy, the Fund may incur certain costs and delays in receiving payment or may suffer a loss of principal and/or interest. When the Fund is a purchaser of an assignment, it succeeds to all the rights and obligations under the loan agreement of the assigning bank or other financial intermediary and becomes a lender under the loan agreement with the same rights and obligations as the assigning bank or other financial intermediary. For example, if a loan is foreclosed, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral.

Floating rate loans are also subject to prepayment risk. Borrowers may pay off their loans sooner than expected particularly when interest rates are falling. The Fund investing in such securities will be forced to reinvest this money at lower yields, which can reduce the Fund's returns. Similarly, debt obligations with call features have the risk that an issuer will exercise the right to pay an obligation (such as a mortgage-backed security) earlier than expected. Pre-payment and call risk typically occur when interest rates are declining. Conversely, when interest rates are rising, the duration of such securities tends to extend, making them more sensitive to changes in interest rates. This is sometimes referred to as extension risk.

Floating rate loans generally are subject to restrictions on transfer, and the Fund may be unable to sell its bank loans at a time when it may otherwise be desirable to do so or may be able to sell them only at prices that are less than their fair market value. The Fund may find it difficult to establish a fair value for loans it holds. Further, the trading market for floating rate loans could be impacted by regulatory action or reforms around the manner in which floating interest rates are determined. If a published rate is unavailable, the rate of interest on a floating rate loan could effectively become fixed, which would in turn adversely affect the value of the floating rate loan. In addition, floating rate loans generally are subject to extended settlement periods in excess of seven days, which may impair the Fund's ability to sell or realize the full value of its loans in the event of a need to liquidate such loans. The Fund has established a line of credit facility to assist with cash flow management and liquidity.

A loan may not be fully collateralized and can decline significantly in value. In addition, the Fund's access to collateral may be limited by bankruptcy or other insolvency laws. Further, loans held by the Fund may not be considered securities and, therefore, purchasers, such as the Fund, may not be entitled to rely on the anti-fraud protections of the federal securities laws.

If the Fund acquires a participation in a loan, the Fund may not be able to control the exercise of remedies that the lender would have under the loan and likely would not have any rights against the borrower directly. Loans made to finance highly leveraged corporate acquisitions may be especially

vulnerable to adverse changes in economic or market conditions. A loan may also be in the form of a bridge loan, which are designed to provide temporary or “bridge” financing to a borrower, pending the sale of identified assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. A borrower’s use of a bridge loan involves a risk that the borrower may be unable to locate permanent financing to replace the bridge loan, which may impair the borrower’s perceived creditworthiness.

Foreign Investment Risk. The Fund may have significant exposure to securities or obligations of foreign companies through its investments in financial instruments, such as ADRs, which are indirectly linked to the performance of foreign issuers. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. Investing in financial instruments that are indirectly linked to the performance of foreign issuers may involve risks not typically associated with investing in U.S. issuers. The value of financial instruments denominated in foreign currencies, and of distributions from such financial instruments, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign markets generally have less trading volume and less liquidity than U.S. markets, and prices in some foreign markets may fluctuate more than those of financial instruments traded on U.S. markets. Many foreign countries lack accounting and disclosure standards comparable to those that apply to U.S. companies, and it may be more difficult to obtain reliable information regarding a foreign issuer's financial condition and operations. In certain countries, legal remedies available to investors may be more limited than those available with respect to investments in the United States. Transaction costs and costs associated with custody services are generally higher for foreign securities than they are for U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries portions of these taxes are recoverable, the non-recovered portion will reduce the income received by the Fund.

High Yield Securities Risk. Securities rated “BB” or below by S&P or “Ba” or below by Moody’s are known as high yield securities and are commonly referred to as “junk bonds.” Such securities entail greater price volatility and credit and interest rate risk than investment-grade securities. Analysis of the creditworthiness of high yield issuers is more complex than for higher-rated securities, making it more difficult for the Sub-Advisor to accurately predict risk. There is a greater risk with high yield fixed income securities that an issuer will not be able to make principal and interest payments when due. If the Fund pursues missed payments, there is a risk that Fund expenses could increase. In addition, lower-rated securities may not trade as often and may be less liquid than higher-rated securities, especially during periods of economic uncertainty or change. As a result of all of these factors, these securities are generally considered to be speculative.

Illiquid Investments Risk. In certain circumstances, it may be difficult for the Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for the Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Sub-Advisor to dispose of such securities at a fair price at the time the Sub-Advisor believes it is desirable to do so. In addition, the Fund’s investments in ETNs and certain other ETPs may be subject to restrictions on the amount and timing of any redemptions. The Fund’s investments in such securities may restrict the Fund’s ability to take advantage of other market opportunities and adversely affect the value of the Fund’s portfolio holdings. The Fund’s investments in certain ETPs also may be subject to trading halts caused by extraordinary market volatility pursuant to “circuit breaker” rules.

Income Risk. The market value of fixed income investments changes in response to interest rate changes and other factors. The Fund’s income could decline due to falling market interest rates. This is because, in a falling interest rate environment, a fund generally will have to invest the proceeds from sales of fund

shares, as well as the proceeds from maturing portfolio securities in lower-yielding securities. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. During periods of falling interest rates, certain debt obligations with high interest rates may be prepaid (or “called”) by the issuer prior to maturity.

Interest Rate Risk. The values of fixed rate debt securities usually rise and fall in response to changes in interest rates. Declining interest rates generally increase the value of existing debt instruments, and rising interest rates generally decrease the value of existing debt instruments. Changes in a debt instrument’s value usually will not affect the amount of interest income paid to the Fund, but will affect the value of the Fund’s shares. Interest rate risk is generally greater for investments with longer maturities. Certain securities pay interest at variable or floating rates. Variable rate securities reset at specified intervals, while floating rate securities reset whenever there is a change in a specified index rate. In most cases, these reset provisions reduce the effect of changes in market interest rates on the value of the security. However, some securities do not track the underlying index directly, but reset based on formulas that can produce an effect similar to leveraging; others may also provide for interest payments that vary inversely with market rates. The market prices of these securities may fluctuate significantly when interest rates change.

Some investments give the issuer the option to call or redeem an investment before its maturity date. If an issuer calls or redeems an investment during a time of declining interest rates, the Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore it might not benefit from any increase in value as a result of declining interest rates.

Leverage Risk. Leverage is investment exposure that exceeds the initial amount invested. The loss on a leveraged investment may far exceed the Fund’s principal amount invested. Leverage can magnify the Fund’s gains and losses and, therefore, increase its volatility. There is no guarantee that the Fund will use leverage, or when it does, that the Fund’s leveraging strategy will be successful. The Fund cannot guarantee that the use of leverage will produce a high return on an investment. The Sub-Advisor will segregate liquid assets or otherwise cover transactions that may give rise to leverage risk to the extent of the financial exposure to the Fund. This requirement limits the amount of leverage the Fund may have at any one time, but it does not eliminate leverage risk. The use of leverage may result in the Fund having to liquidate holdings when it may not be advantageous to do so in order to satisfy its obligation or to meet segregation requirements.

Loan Participation Risk. A loan participation agreement involves the purchase of a share of a loan made by a bank to a company in return for a corresponding share of borrower’s principal and interest payments. The principal credit risk associated with acquiring loan participation interests is the credit risk associated with the underlying corporate borrower. There is also a risk that there may not be a readily available market for loan participation interests and, in some cases, this could result in the Fund disposing of such securities at a substantial discount from face value or holding such securities until maturity.

Management Risk. The Sub-Advisor continuously evaluates the Fund’s holdings, purchases and sales with a view to achieving the Fund’s investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor’s judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment. In fact, no matter how good a job the Sub-Advisor does, you could lose money on your investment in the Fund, just as you could with other investments. If the Sub-Advisor is incorrect in its assessment of the income, growth or price realization

potential of the Fund's holdings or incorrect in its assessment of general market or economic conditions, then the value of the Fund's shares may decline.

Market Risk. Investments in securities, in general, are subject to market risks that may cause their prices to fluctuate over time. The Fund's investments may decline in value due to factors affecting securities or commodities markets generally, such as real or perceived adverse economic conditions or changes in interest or currency rates, or particular countries, segments, economic sectors, industries or companies within those markets. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of securities and financial instruments in which the Fund invests will cause the NAV of the Fund to fluctuate. Historically, the markets have moved in cycles, and the value of the Fund's securities may fluctuate drastically from day to day. Because of its link to the markets, an investment in the Fund may be more suitable for long-term investors who can bear the risk of short-term principal fluctuations, which at times may be significant.

Prepayment Risk. The Fund invests in floating rate loans and may invest in mortgage related securities, each of which, like other debt securities, may be paid off early if the issuer of a security can repay principal prior to the maturity date. If interest rates are falling, the Fund may have to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income. If interest rates are rising, the duration of fixed rate mortgage-related securities may be extended, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if the Fund holds mortgage-related securities, it may exhibit additional volatility. This is known as extension risk.

Trading Risk. Shares of the Fund may trade above or below their NAV. The NAV of shares will fluctuate with changes in the market value of the Fund's holdings. The trading prices of shares will fluctuate in accordance with changes in NAV, as well as market supply and demand. When the market price of the Fund's shares deviates significantly from NAV, you may pay significantly more or receive significantly less than the underlying value of the Fund's shares. However, given that shares can be created and redeemed only in Creation Units at NAV, the Advisor does not believe that large discounts or premiums to NAV will exist for extended periods of time. Although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active market for shares will develop or be maintained. In addition, trading shares of the Fund may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable.

OTHER INVESTMENT PRACTICES AND STRATEGIES

Temporary Defensive Positions. To respond to adverse market, economic, political or other conditions, the Fund may invest up to 100% of its total assets, without limitation, in debt securities and money market instruments. The Fund may be invested in this manner for extended periods, depending on the Sub-Advisor's assessment of market conditions. Debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. government securities, repurchase agreements and bonds that are rated BBB or higher. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market funds, the Fund would bear its pro rata portion of each such money market fund's advisory fees and operational expenses.

Please see the Fund's Statement of Additional Information ("SAI") for a more complete list of portfolio investment strategies, permitted investments and related risks.

PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the disclosure of Fund portfolio securities is available in the SAI and on the Trust's website at www.advisorshares.com. The Fund's daily portfolio holdings information also is available on the Trust's website.

MANAGEMENT OF THE FUND

INVESTMENT ADVISOR

AdvisorShares Investments, LLC, located at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814, serves as investment advisor of the Fund. As of September 30, 2018, the Advisor had approximately \$794 million in assets under management.

The Advisor continuously reviews, supervises, and administers the Fund's investment program. In particular, the Advisor provides investment and operational oversight of the Sub-Advisor. The Board supervises the Advisor and establishes policies that the Advisor must follow in its day-to-day management activities. Pursuant to an investment advisory agreement between the Trust and the Advisor, the Advisor is entitled to receive an annual advisory fee of 0.95% based on the average daily net assets of the Fund. The Advisor pays the Sub-Advisor out of the advisory fee it receives from the Fund. For the most recent fiscal year, the Fund paid the Advisor 0.43% after waivers based on its average daily net assets.

The Advisor bears all of its own costs associated with providing these advisory services and the expenses of the members of the Board who are affiliated with the Advisor. The Advisor may make payments from its own resources to broker-dealers and other financial institutions in connection with the sale of Fund shares.

The Advisor has contractually agreed to waive its fees and/or reimburse expenses in order to keep net expenses (excluding amounts payable pursuant to a plan adopted in accordance with Rule 12b-1, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures that are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 1.10% of the Fund's average daily net assets for at least one year from the date of this Prospectus. The expense limitation agreement may be terminated without payment of any penalty (i) by the Trust for any reason and at any time and (ii) by the Advisor, for any reason, upon ninety (90) days' prior written notice to the Trust, such termination to be effective as of the close of business on the last day of the then-current one-year period. If at any point it becomes unnecessary for the Advisor to waive fees or reimburse expenses, the Board may permit the Advisor to retain the difference between the Fund's total annual operating expenses and the expense limitation currently in effect, or, if lower, the expense limitation that was in effect at the time of the waiver and/or reimbursement, to recapture all or a portion of its prior fee waivers or expense reimbursements made during the immediately preceding three-year period.

Pursuant to an exemptive order from the SEC, the Advisor, subject to certain conditions, has the right, without shareholder approval, to hire a new unaffiliated sub-advisor or materially amend the terms of a sub-advisory agreement with an unaffiliated sub-advisor when the Board and the Advisor believe that a change would benefit the Fund. The Prospectus will be supplemented when there is a significant change in the Fund's sub-advisory arrangement.

A discussion regarding the basis for the Board's most recent approval of the Fund's investment advisory agreement is available in the Trust's Semi-Annual Report to Shareholders dated December 31, 2017.

INVESTMENT SUB-ADVISOR

Pacific Life Fund Advisors LLC d/b/a Pacific Asset Management, located at 700 Newport Center Drive, Newport Beach, California 92660, serves as investment sub-advisor to the Fund. The Sub-Advisor is

responsible for selecting the Fund's investments in accordance with the Fund's investment objective, policies and restrictions. The Sub-Advisor serves as investment advisor to a variety of open-ended mutual funds, private funds and institutional investor accounts. As of September 30, 2018, the Sub-Advisor had approximately \$10.6 billion in assets under management.

A discussion regarding the basis for the Board's most recent approval of the Fund's investment sub-advisory agreement is available in the Trust's Semi-Annual Report to Shareholders dated December 31, 2017.

PORTFOLIO MANAGERS

The following portfolio managers are primarily responsible for the day-to-day management of the Fund.

Bob Boyd, *Portfolio Manager and ETF Investment Committee Member*. Mr. Boyd is a Managing Director for the Sub-Advisor and a member of the Sub-Advisor's ETF Investment Committee. He serves as a Portfolio Manager and Credit Analyst for the firm. Mr. Boyd joined the Sub-Advisor in 2012. Previously, he was with Pacific Investment Management (PIMCO) for 14 years, where he was a Vice President, Bank Loan Portfolio Manager, and Credit Analyst. Mr. Boyd has over 19 years of investment experience, focused on leveraged finance, credit analysis, and structured products. He holds a bachelor's degree from California State University, Long Beach and an MBA from the University of Southern California.

Michael Marzouk, *CFA, Portfolio Manager and ETF Investment Committee Member*. Mr. Marzouk is a Managing Director for the Sub-Advisor and a member of the Sub-Advisor's ETF Investment Committee. Mr. Marzouk serves as a Portfolio Manager and Credit Analyst for the firm. He joined the Sub-Advisor in 2007. Mr. Marzouk has over 19 years of investment experience focused on leveraged finance and credit research. Mr. Marzouk has a bachelor's degree from the University of California, Los Angeles and an MBA from the Anderson School of Management.

Additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of securities in the Fund is available in the SAI.

OTHER SERVICE PROVIDERS

Foreside Fund Services, LLC (the "Distributor") is the principal underwriter and distributor of the Fund's shares. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The Distributor is not affiliated with the Advisor, Sub-Advisor, The Bank of New York Mellon or any of their respective affiliates.

The Bank of New York Mellon, located at 240 Greenwich Street, New York, New York 10286, serves as the administrator, custodian, transfer agent and fund accounting agent for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, located at 1818 Market Street, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

SHAREHOLDER INFORMATION

CALCULATING NET ASSET VALUE

The Fund calculates NAV by (i) taking the current market value of its total assets, (ii) subtracting any liabilities, and (iii) dividing that amount by the total number of shares owned by shareholders.

The Fund calculates NAV once each business day as of the regularly scheduled close of normal trading on the New York Stock Exchange, LLC (the “NYSE”) (normally 4:00 p.m. Eastern Time). The NYSE is typically closed on weekends and most national holidays.

In calculating NAV, the Fund generally values its portfolio investments at market prices. If market prices are unavailable or the Fund thinks that they are unreliable, or when the value of a security has been materially affected by events occurring after the relevant market closes, the Fund will price those securities at fair value as determined in good faith using methods approved by the Board.

The use of fair valuation in pricing a security involves the consideration of a number of subjective factors and, therefore, is susceptible to the unavoidable risk that the valuation may be higher or lower than the price at which the security might actually trade if a reliable market price were readily available.

More information about the valuation of the Fund’s holdings can be found in the SAI.

SHARE TRADING PRICES

The price of the Fund’s shares is based on market price, which may differ from the Fund’s daily NAV per share and can be affected by market forces of supply and demand, economic conditions and other factors. The Exchange intends to disseminate the approximate value (also known as the “indicative optimized portfolio value” or IOPV) of the portfolio underlying a share of the Fund every fifteen seconds. This approximate value should not be viewed as a “real-time” update of the NAV per share of the Fund because the approximate value may not be calculated in the same manner as the NAV per share, which is computed once per day. The approximate value generally is determined by using current market quotations, price quotations obtained from broker-dealers that may trade in the securities and instruments held by the Fund, and/or amortized cost for securities with remaining maturities of 60 days or less, based on securities and/or cash as reflected in the basket for a Creation Unit. If applicable, each approximate value also reflects changes in currency exchange rates between the U.S. dollar and the applicable currency. The approximate value is based on applicable quotes or closing prices from the securities’ local market and may not reflect events that occur subsequent to the local market’s close. The approximate value does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time (e.g., the securities in the basket for a Creation Unit may include securities that are not part of the Fund’s portfolio) or the precise valuation of the current portfolio. The Fund is not involved in, or responsible for, the calculation or dissemination of such values and makes no warranty as to their accuracy.

PREMIUM/DISCOUNT INFORMATION

Information showing the number of days that the market price of the Fund’s shares was greater than the Fund’s NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund’s NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund’s website at www.advisorshares.com.

DIVIDENDS AND DISTRIBUTIONS

The Fund pays out dividends and distributes its net capital gains, if any, to shareholders at least annually.

ACTIVE INVESTORS AND MARKET TIMING

Shares of the Fund are listed for trading on the Exchange, which allows retail investors to purchase and sell individual shares at market prices throughout the trading day similar to other publicly traded securities. Because these secondary market trades do not involve the Fund directly, it is unlikely that secondary market trading would cause any harmful effects of market timing, such as dilution, disruption of portfolio management, increases in the Fund's trading costs, or realization of capital gains. The Board has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the Fund's shares because the Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of a Participant Agreement between the Distributor and an Authorized Participant, generally in exchange for a specified amount of cash totaling the NAV of the Creation Units. Direct trading by Authorized Participants is critical to ensuring that the Fund's shares trade at or close to NAV. The Fund also imposes transaction fees on such Creation Unit transactions that are designed to offset the Fund's transfer and other transaction costs associated with the issuance and redemption of the Creation Unit shares.

BOOK ENTRY

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. DTC, or its nominee, is the record owner of all outstanding shares of the Fund and is recognized as the owner of all shares.

Investors owning shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants (*e.g.*, broker-dealers, banks, trust companies, or clearing companies). These procedures are the same as those that apply to any stocks that you hold in book entry or "street name" through your brokerage account.

INVESTING IN THE FUND

For more information on how to buy and sell shares of the Fund, call the Trust at 877.843.3831 or visit the Fund's website at www.advisorshares.com.

DISTRIBUTION PLAN

The Fund has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services. The Fund will pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of its average daily net assets. If a service provider provides distribution services, the Distributor will pay the service provider out of its distribution fees.

No distribution fees are currently charged to the Fund; there are no plans to impose distribution fees, and no distribution fees will be charged for at least one year from the date of this Prospectus. However, to the extent distribution fees are charged in the future, because the Fund would pay these fees out of assets on an ongoing basis, over time these fees may cost you more than other types of sales charges and would increase the cost of your investment. At such time as distribution fees are charged, the Fund will notify investors by adding disclosure to the Fund's website and in the Fund's Prospectus. Any distribution fees will be approved by the Board.

ADDITIONAL TAX INFORMATION

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-advantaged account. More information about taxes is located in the SAI.

Recently enacted tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”) makes significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules only applicable to a regulated investment company, such as the Fund. The Tax Act, however, makes numerous other changes to the tax rules that may affect shareholders and the Fund. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Fund.

You are urged to consult your tax advisor regarding specific questions as to U.S. federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for U.S. federal income tax purposes and intends to qualify for the special tax treatment afforded to regulated investment companies (“RICs”) under the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). As long as the Fund qualifies for treatment as a RIC, it pays no federal income tax on the earnings it timely distributes to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Tax Status of Distributions

- The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains income.
- The Fund’s distributions from income and net short-term capital gains will generally be taxed to you as ordinary income. Since the Fund’s income is derived primarily from investments other than the stock of U.S. corporations, the Fund does not expect a significant portion of its distributions to qualify to be reported as qualified dividend income (which generally is taxable to noncorporate shareholders at reduced tax rates) or to qualify for the dividends-received deduction for corporate shareholders.
- Any distributions of net capital gain (the excess of the Fund’s net long-term capital gains over its net short-term capital losses) that you receive from the Fund generally are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are taxed to noncorporate shareholders at reduced tax rates.
- Although the Fund may invest in municipal bonds (the interest upon which would be exempt from U.S. federal income tax if received by shareholders directly), Fund distributions attributable to that interest are not expected to be exempt from U.S. federal income tax.
- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.

- Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.
- Shortly after the close of each calendar year, the Fund (or your broker) will inform you of the amount of your ordinary income dividends, foreign tax credits, and net capital gain distributions received from the Fund.
- You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of shares is generally treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less is treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares.

Derivatives and Complex Securities

The Fund and ETPs in which the Fund invests may invest in complex securities such as equity options, index options, repurchase agreements, foreign currency contracts, hedges and swaps, transactions treated as straddles for U.S. federal income tax purposes, and futures contracts. These investments may be subject to numerous special and complex tax rules. These rules could affect the Fund's or the ETPs in which the Fund invests that are taxed as RICs ability to qualify as a RIC, affect whether gains and losses recognized by the Fund or the ETPs in which the Fund invests are treated as ordinary income or loss or capital gain or loss, accelerate the recognition of income to the Fund or the ETPs, cause income or gain to be recognized even though corresponding cash is not received by the Fund or the ETPs and/or defer the Fund's or the ETPs' ability to recognize losses. In turn, those rules may affect the amount, timing or character of the income distributed by the Fund. Additional information regarding the Fund's and ETPs' investments in complex securities can be found in the Fund's SAI.

Investment in Foreign Securities

The Fund and the ETPs in which the Fund invests may be subject to withholding and other taxes imposed by foreign countries on dividends, interest, and other income earned from investing in foreign securities which may reduce the return on such investments. The U.S. has entered into tax treaties with certain foreign countries that may entitle the Fund or the ETPs in which the Fund invests to a reduced rate of, or exemption from, foreign taxes on certain income. The Fund may need to file special claims for refunds to secure the benefits of a reduced rate. The effective rate of foreign tax cannot be determined in advance because the amount of the Fund's assets to be invested within various countries is not known. In addition, the Fund's or an ETP's investments in foreign currencies may increase or accelerate the Fund's recognition of ordinary income and may affect the timing or amount of the Fund's distributions. If as of the close of a taxable year more than 50% of the Fund's assets is represented by stock or securities of foreign corporations, the Fund may elect to permit shareholders to claim a foreign tax credit or deduction (but not both) on their U.S. income tax returns for their pro rata portion of qualified taxes paid by the Fund to foreign countries in respect of foreign securities the Fund has held for at least the minimum period specified in the Internal Revenue Code. For the purposes of the foreign tax credit, each such shareholder would include in gross income from foreign sources its pro rata share of such taxes. Certain limitations imposed by the Internal Revenue Code may prevent shareholders from receiving a full foreign tax credit or deduction for their allocable amount of such taxes.

Medicare Tax

U.S. individuals with income exceeding certain thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” including interest, dividends, and certain capital gains (generally including capital gains distributions and capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors

If you are not a citizen or permanent resident of the United States, the Fund’s ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. The 30% withholding tax generally will not apply to distributions of net capital gain. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax.

Backup Withholding

The Fund will be required in certain cases to withhold (as “backup withholding”) on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (a) the sum of the market value of the Creation Units at the time and any net cash received, and (b) the sum of the purchaser’s aggregate basis in the securities surrendered and any net cash paid for the Creation Units. An Authorized Participant who redeems Creation Units will generally recognize a gain or loss equal to the difference between (x) the sum of the redeemer’s basis in the Creation Units and any net cash paid, and (y) the sum of the aggregate market value of the securities received and any net cash received. The Internal Revenue Service, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” by an Authorized Participant that does not mark-to-market its holdings, or on the basis that there has been no significant change in economic position.

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Internal Revenue Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Fund shares you purchased or redeemed and at what price.

The foregoing discussion summarizes some of the consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences to you of an investment in the Fund under all tax laws applicable to you.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance since the Fund commenced operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost, on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Tait, Weller & Baker LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's Annual Report, which is available upon request.

Investment Operations				
Net Investment Income (Loss) ⁽¹⁾	1.78	1.73	1.74	0.62
Net Realized and Unrealized Gain (Loss)	(0.63)	0.58	(0.95)	(0.38)
Distributions of Net Realized Gains by other investment companies	---	---	---	---
Net Increase (Decrease) in Net Assets Resulting from Investment Operations ⁽²⁾	<u>1.15</u>	<u>2.31</u>	<u>0.79</u>	<u>0.24</u>
Distributions from Net Investment Income	(1.63)	(1.69)	(1.72)	(0.58)
Distributions from Realized Capital Gains	---	---	---	---
Total Distributions	<u>(1.63)</u>	<u>(1.69)</u>	<u>(1.72)</u>	<u>(0.58)</u>
Net Asset Value, End of Year/Period	<u>\$48.87</u>	<u>\$49.35</u>	<u>\$48.73</u>	<u>\$49.66</u>
Market Value, End of Year/Period	<u>\$48.99</u>	<u>\$49.33</u>	<u>\$48.26</u>	<u>\$49.78</u>
Total Return				
Total Investment Return Based on Net Asset Value ⁽³⁾	2.36%	4.78%	1.69%	0.47%
Total Investment Return Based on Market Value ⁽³⁾	2.65%	5.75%	0.46%	0.71%
Ratios/ Supplemental Data				
Net Assets, End of Year/Period (000's omitted)	\$29,323	\$27,143	\$26,800	\$27,312
Ratio to Average Net Assets of:				
Expenses, net of expense waivers and reimbursements ⁽⁴⁾	1.10%	1.10%	1.10%	1.10%
Expenses, prior to expense waivers and reimbursements ⁽⁴⁾	1.62%	1.39%	1.51%	1.41%
Net Investment Income (Loss) ⁽⁴⁾	3.61%	3.49%	3.58%	3.46%
Portfolio Turnover Rate ⁽⁵⁾	73%	52%	27%	102%

* Commencement of operations.

⁽¹⁾ Based on average shares outstanding.

⁽²⁾ The amount shown for a share distribution throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Fund Shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

⁽³⁾ Net asset value total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions on ex-date, if any, at net asset value during the period, and redemption on the last day of the period. Periods less than one year are not annualized. Market value total return is calculated assuming an initial investment made at the market value at the beginning of the period, reinvestment of all dividends and distributions at market value during the period on pay date, and sale at the market value on the last day of the period.

⁽⁴⁾ Ratios of periods of less than one year have been annualized. Excludes expenses incurred by the underlying investments in other funds.

⁽⁵⁾ Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as in-kind creations or redemptions of the Fund's capital shares.

ADDITIONAL INFORMATION

Additional and more detailed information about the Fund is included in the Fund’s SAI. The SAI has been filed with the SEC and is incorporated by reference into this Prospectus and, therefore, legally forms a part of this Prospectus. The SEC maintains the EDGAR database on its website (<http://www.sec.gov>), which contains the SAI, material incorporated by reference, and other information about the Fund. You may request documents from the SEC by mail, upon payment of a duplication fee, by emailing the SEC at publicinfo@sec.gov.

You may obtain a copy of the SAI and the Annual and Semi-Annual Reports without charge, by calling 877.843.3831, visiting the website at www.advisorshares.com, or writing to the Trust at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814. Additional information about the Fund’s investments is available in the Fund’s Annual and Semi-Annual Reports. Also in the Fund’s Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund’s performance during the last fiscal year.

No one has been authorized to give any information or to make any representations not contained in this Prospectus or in the SAI in connection with the offering of Fund shares. Do not rely on any such information or representations as having been authorized by the Fund. This Prospectus does not constitute an offering by the Fund in any jurisdiction where such an offering is not lawful.

The Trust’s SEC Investment Company Act File Number is 811-22110.
