ADVISORSHARES PERITUS HIGH YIELD ETF
NYSE Arca Ticker: HYLD

FUND SUMMARY

INVESTMENT OBJECTIVE

The AdvisorShares Peritus High Yield ETF (the “Fund”) seeks high current income with a secondary goal of capital appreciation.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Most investors will incur customary brokerage commissions when buying or selling shares of the Fund, which are not reflected in the table below.

SHAREHOLDER FEES (<i>fees paid directly from your investment</i>)	None
ANNUAL FUND OPERATING EXPENSES (<i>expenses that you pay each year as a percentage of the value of your investment</i>)	
MANAGEMENT FEES	1.10%
DISTRIBUTION (12b-1) FEES	0.00%
OTHER EXPENSES	0.18%
TOTAL ANNUAL OPERATING EXPENSES	1.28%

EXAMPLE

This Example is intended to help you compare the cost of investing in the shares of the Fund with the cost of investing in other funds. This Example does not take into account creation or redemption transaction fees, or the brokerage commissions that you pay when purchasing or selling shares of the Fund. If these fees and commissions were included, your costs would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
AdvisorShares Peritus High Yield ETF	\$130	\$406	\$702	\$1,545

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Operating Expenses or in the Example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s shares. During the most recent fiscal year ended June 30, 2016, the Fund’s portfolio turnover rate was 79% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Peritus I Asset Management, LLC (the “Sub-Advisor”) seeks to achieve the Fund’s investment objective by selecting a focused portfolio of high-yield debt securities, which include senior and subordinated corporate debt obligations (such as loans, bonds, debentures, notes and commercial paper). Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in high-yield debt securities. The Fund does not have any portfolio maturity limitation and may invest its assets in instruments with short-term, medium-term or long-term maturities.

In selecting securities for the Fund’s portfolio, the Sub-Advisor, subject to the oversight of the Advisor and the Board, performs an independent investment analysis of each issuer to determine its creditworthiness. The Sub-Advisor takes a deep value contrarian approach to the credit markets, focusing on absolute value. The Sub-Advisor largely focuses on the secondary market, often investing in assets at a discount to par (\$100), allowing for a potential opportunity to generate capital gains in addition to current yield. The Sub-Advisor believes that structural and technical inefficiencies exist in the secondary credit markets, which create tremendous investment opportunities, and that, by holding a diversified but limited number of securities, the portfolio will be constructed of securities that provide exposure to industries believed to offer the most value to the Fund. Companies in the energy sector have significant representation in the high-yield debt securities market.

The Fund also may invest in equity securities that the Sub-Advisor believes will yield high dividends or are otherwise consistent with the Fund’s investment objective.

PRINCIPAL RISKS OF INVESTING IN THE FUND

The Fund is subject to a number of risks, as described below, that may affect the value of its shares, including the possible loss of money. As with any fund, there is no guarantee that the Fund will achieve its investment objective.

Credit Risk. The Fund is subject to the risk that an issuer of a fixed income security, such as a corporate bond, may be unable or unwilling to make interest and principal payments when due. The Fund is also subject to the related risk that the value of a fixed income security may decline because of concerns about the issuer’s creditworthiness. Credit risk is heightened to the extent the Fund invests in high-yield debt securities.

Equity Risk. The prices of equity securities rise and fall daily. These price movements may result from factors affecting individual issuers, industries or the securities market as a whole. In addition, equity markets tend to move in cycles which may cause stock prices to fall over short or extended periods of time.

Energy Sector Risk. Issuers in energy-related industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers. Companies in the energy sector may need to make substantial expenditures, and to incur significant amounts of debt, in order to maintain or expand their reserves. Oil and gas exploration and production can be significantly affected by natural disasters, as well as changes in exchange rates, interest rates, government regulation, world events and economic conditions. These companies may be at risk for environmental damage claims.

Fixed Income Securities Risk. The market value of fixed income investments in which the Fund may invest may change in response to interest rate changes and other factors. During periods of falling interest rates, the value of outstanding fixed income securities may rise. Conversely, during periods of rising interest rates, the value of fixed income securities may decline.

High-Yield Risk. The Fund’s investments in high-yield securities and unrated securities of similar credit quality (commonly known as junk bonds or below investment grade debt) may be subject to greater levels of

interest rate, credit and liquidity risk than funds that do not invest in such securities. These securities are considered predominately speculative with respect to the issuer's continuing ability to make principal and interest payments.

Issuer Risk. The value of a debt security may decline for a number of reasons directly related to the issuer of such security, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

Liquidity Risk. Liquidity risk exists when particular Fund investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Loan Participation Risk. The Fund may not have a readily available market for loan participation interests and, in some cases, the Fund may have to dispose of such securities at a substantial discount from face value. Loan participations also involve the credit risk associated with the underlying corporate borrower.

Management Risk. The Sub-Advisor continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, the achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment.

Market Risk. Due to market conditions, the value of the Fund's investments may fluctuate significantly from day to day. Price fluctuations may be temporary or may last for extended periods. This volatility may cause the value of your investment in the Fund to decrease.

Trading Risk. Shares of the Fund may trade above or below their net asset value ("NAV"). The trading price of the Fund's shares may deviate significantly from their NAV during periods of market volatility. There can be no assurance that an active trading market for the Fund's shares will develop or be maintained. In addition, trading in shares of the Fund may be halted because of market conditions or for reasons that, in the view of the NYSE Arca, Inc. (the "Exchange"), make trading in shares inadvisable.

FUND PERFORMANCE

The bar chart and table that follow show how the Fund has performed on a calendar year basis and provide an indication of the risks of investing in the Fund. The table also shows how the Fund's performance compares to the Barclays U.S. Corporate High Yield Index, which is an unmanaged index, considered representative of the universe of U.S. fixed rate, non-investment-grade debt. Both the bar chart and the table assume the reinvestment of all dividends and distributions. Past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Updated performance information is available on the Fund's website at www.advisorshares.com.

The Fund's year-to-date total return as of September 30, 2016 was 12.04%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	6.89%	1Q/2012
Lowest Return	-13.72%	4Q/2014

AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED DECEMBER 31, 2015

AdvisorShares Peritus High Yield ETF	1 Year	5 Year	Since Inception (11/30/2010)
Return Before Taxes Based on NAV	-13.85%	0.03%	0.28%
Return After Taxes on Distributions ¹	-17.20%	-3.26%	-3.00%
Return After Taxes on Distributions and Sale of Fund Shares ¹	-7.62%	-1.03%	-0.83%
Barclays U.S. Corporate High Yield Index (Reflects no deduction for fees, expenses, or taxes)	-4.47%	5.04%	5.32%

¹ After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

MANAGEMENT

Name	Title
AdvisorShares Investments, LLC	Advisor
Peritus I Asset Management, LLC	Sub-Advisor

PORTFOLIO MANAGERS

Name and Title	Length of Service with Sub-Advisor
Tim Gramatovich, Chief Investment Officer	since 1995
Ron Heller, Chief Executive Officer and Senior Portfolio Manager	since 1995
Dave Flaherty, Senior Portfolio Manager	since 2004

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems shares on a continuous basis at NAV only in a large specified number of shares called a “Creation Unit.” The shares of the Fund that trade on the Exchange are “created” at their NAV by market makers, large investors and institutions only in block-size Creation Units of 50,000 shares. A “creator” enters into an authorized participant agreement (“Participant Agreement”) with the Distributor or uses a Depository Trust Company (“DTC”) participant who has executed a Participant Agreement (an “Authorized Participant”), and deposits into the Fund a portfolio of securities closely approximating the holdings of the Fund and a specified amount of cash, together totaling the NAV of the Creation Unit(s), in exchange for 50,000 shares of the Fund (or multiples thereof).

Individual Fund shares may only be purchased and sold in secondary market transactions through brokers. The shares of the Fund are listed on the Exchange, and because shares trade at market prices rather than at NAV, shares may trade at a value greater than or less than their NAV.

TAX INFORMATION

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income or capital gains (or a combination thereof), unless you are investing through a tax-advantaged arrangement such as a 401(k) plan or an individual retirement account (“IRA”), which may be taxed upon withdrawal.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

Investors purchasing shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund, the Advisor or the Sub-Advisor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing broker-dealers or other intermediaries and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

MORE INFORMATION ABOUT THE TRUST AND THE FUND

AdvisorShares Trust (the “Trust”) is a Delaware statutory trust offering a number of professionally managed investment portfolios or funds. Creation Units of the Fund are issued and redeemed principally in-kind for portfolio securities and a specific cash payment.

EXCEPT WHEN AGGREGATED IN CREATION UNITS, SHARES OF THE FUND ARE NOT REDEEMABLE SECURITIES.

MORE INFORMATION ABOUT THE FUND’S INVESTMENT OBJECTIVE

The investment objective of the Fund is non-fundamental and may be changed by the Trust’s Board of Trustees (the “Board”) without a shareholder vote.

MORE INFORMATION ABOUT THE FUND’S PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”) and, thus, does not seek to replicate the performance of a specified passive index of securities. Instead, it uses an active investment strategy in seeking to meet its investment objective. The Sub-Advisor, subject to the oversight of the Advisor and the Board, has discretion on a daily basis to manage the Fund’s portfolio in accordance with the Fund’s investment objective and investment policies.

The Sub-Advisor seeks to achieve the Fund’s investment objective by selecting a focused portfolio largely of high-yield debt securities, which include senior and subordinated corporate debt obligations (such as loans, bonds, debentures, notes and commercial paper). The Sub-Advisor often aims to acquire these securities at discounts to par (\$100), which will allow for a potential opportunity to generate additional capital gains. Debt securities that comprise the Fund’s portfolio are individually picked by the Sub-Advisor in the belief that each security can add value in terms of high risk adjusted returns. By holding a diversified but limited number of securities, the Sub-Advisor can pick and choose the industries and securities it believes offer the most value to the Fund. These high-yield corporate debt obligations are principally purchased in the public secondary market.

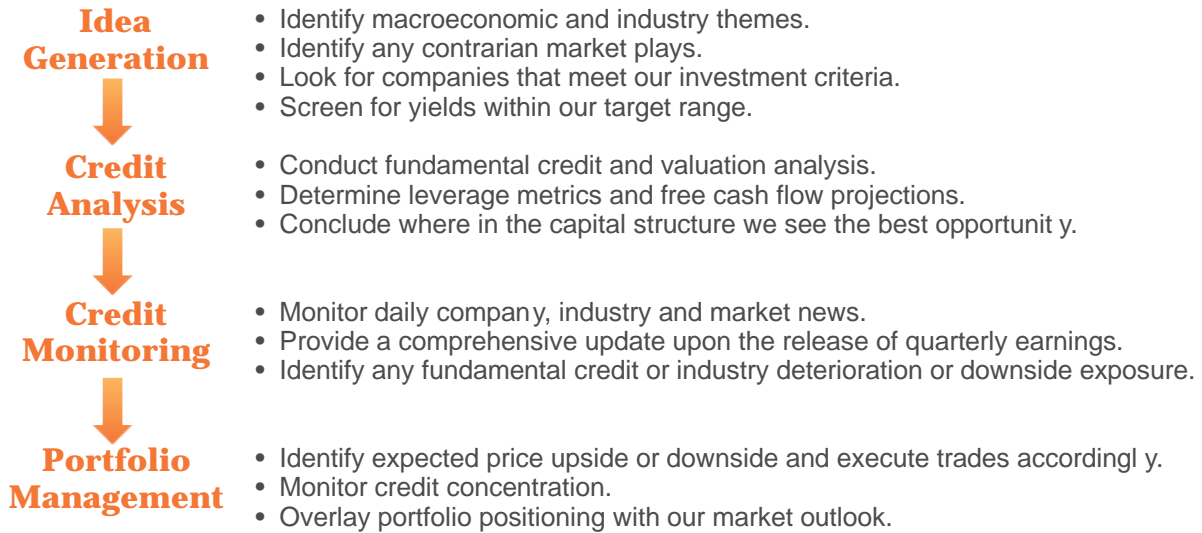

The Fund also may invest up to 20% of its net assets in equity securities that the Sub-Advisor believes will yield high dividends or are otherwise consistent with the Fund’s investment objective.

Investment Philosophy

The Sub-Advisor seeks to take advantage of the fact that most fixed income investors continue to use ratings as one of their primary investment tools. The Sub-Advisor, however, believes that the focus should be on the fundamentals of the businesses in which the Fund invests rather than ratings. The Sub-Advisor views credit as either “AAA” or “D” (*i.e.*, it either pays or does not). Due to this investment ideology, the Sub-Advisor places limited value on credit ratings and instead focuses on true cash flow while looking to buy credit at prices that it feels provide a margin of safety. Additional factors are considered when constructing the portfolio, including, but not limited to, excess cash on the balance sheet and/or a history of producing real free cash flow, as well as a capital structure that can be sustained on conservative forecasts.

Selection Process

The Sub-Advisor reverse engineers the traditional financial analysis process when reviewing each issuer’s creditworthiness. Each analysis begins with the Statement of Cash Flows, moves to the Balance Sheet and then to the Income Statement. The investment team looks at a complete appraisal of the business’ intrinsic value, rather than just traditional credit analysis. Through fundamental and valuation analysis, the Sub-Advisor not only determines whether an investment should be made in a certain company, but also where in the capital structure (secured, senior, or subordinate) the risk/return is most attractive.

The graphic representation is intended to generally demonstrate the potential investment rationale and analysis performed by the Sub-Advisor on a prospective investment. All processes, procedures and investment criteria do not apply in every circumstance and are subject to change.

Investment Approach

- The Sub-Advisor seeks to construct a focused portfolio, largely of high-yield debt securities, which include senior and subordinated corporate debt obligations (such as loans, bonds, debentures, notes and commercial paper).
- Primarily focus on the “secondary” market, which means the Sub-Advisor often invests in assets at a discount to par (\$100).
- Belief that structural and technical inefficiencies exist in the secondary credit markets which create tremendous opportunities.
- A deep value contrarian approach to the credit markets, focusing on absolute returns.
- The Sub-Advisor views credit as either “AAA” or “D” and places limited value on rating agencies or their methodologies which lag the market perception of risk.
- Ideas, themes and investment process are generated internally by the Sub-Advisor. The Sub-Advisor does not solely rely on Wall Street sell side information.
- The Sub-Advisor views participation as “senior equity” even though they are investing in performing debt. The Sub-Advisor does not stop with traditional credit analysis, but looks at a complete appraisal of the intrinsic value of each business in which it intends to invest.

Investment Process

- Target investments that possess some or all of the following characteristics: product or service is “essential” and recurring; hard asset values; quantifiable downside risk; ability to generate free cash flow; stable revenue stream; manageable balance sheet; traditional covenant protection; acceptable leverage through debt tranche (subordination).
- Before being purchased into the portfolio, each security goes through a rigorous credit and valuation analysis.
- Events which can create a sale or exit strategy within a portfolio include: poison puts – change of control covenants from merger or buyout activity; refinancing/calls – company decides to take out the bonds according to a scheduled price; tenders – company offers to buy your security at a set price; maturities; and default as well as a fundamental deterioration or yields no longer meeting internal targets.

Portfolio Focus

Issuers – The Sub-Advisor lets the value observed in the market dictate diversification rather than accepting securities that are viewed as less desirable for the sake of diversification.

Coupon Characteristics – Focus on the non-investment-grade market, which typically has high coupons reflecting the relative risk of the credits.

Current Yield – Because of its focus on value and generally buying in the secondary market (often buying at a discount to par), the Fund expects to achieve a current yield that, on a weighted average basis, exceeds that of the relevant market indexes (*e.g.*, Barclays U.S. High Yield Index).

Maturity Profile – Because of a focus primarily on seasoned credits, the stated maturity tends to be shorter than that of the market indexes, while actual maturity is generally even shorter due to early re-financings and take-outs via calls, puts and tenders.

MORE INFORMATION ABOUT THE PRINCIPAL RISKS OF INVESTING IN THE FUND

The Fund is subject to a number of risks that may affect the value of its shares. This section provides additional information about the Fund’s principal risks. The degree to which the risks described below apply to the Fund varies according to its investment allocation. Each investor should review the complete description of the principal risks before investing in the Fund. As with investing in other securities whose prices increase and decrease in market value, you may lose money by investing in the Fund.

Credit Risk. Credit risk is the risk that the Fund could lose money if an issuer or guarantor of a debt instrument becomes unwilling or unable to make timely principal and/or interest payments, or to otherwise meet its obligations. The Fund is also subject to the risk that its investment in a debt instrument could decline because of concerns about the issuer’s credit quality or perceived financial condition. Fixed income securities are subject to varying degrees of credit risk, which are sometimes reflected in credit ratings.

Equity Risk. The prices of equity securities rise and fall daily. These price movements may result from factors affecting individual companies, industries or the securities market as a whole. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may decline in response. In addition, the equity market tends to move in cycles which may cause stock prices to rise over short or extended periods of time.

Energy Sector Risk. Issuers in energy-related industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels caused by geopolitical events, energy conservation or use of alternative fuel sources, the success of exploration projects, weather or meteorological events, taxes,

increased governmental or environmental regulation, resource depletion, rising interest rates, declines in domestic or foreign production, accidents or catastrophic events, or terrorist threats or attacks, among others. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers. Companies in the energy sector may need to make substantial expenditures, and to incur significant amounts of debt, in order to maintain or expand their reserves through exploration of new sources of supply, through the development of existing sources, through acquisitions, or through long-term contracts to acquire reserves. Factors adversely affecting producers, refiners, distributors, or others in the energy sector may affect adversely companies that service or supply those entities, either because demand for those services or products is curtailed, or those services or products come under price pressure.

Fixed Income Securities Risk. The Fund may directly or indirectly invest in fixed income securities. Fixed income securities are debt obligations issued by corporations, municipalities and other borrowers. Coupons may be fixed or adjustable, based on a pre-set formula. The market value of fixed income investments may change in response to interest rate changes and other factors. Fixed income securities are subject to the risk that the securities may be paid off earlier or later than expected. Either situation could cause the Fund to hold securities paying lower-than-market rates of interest, which could adversely affect the Fund's yield or share price. In addition, rising interest rates tend to extend the duration of certain fixed income securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, the Fund may exhibit additional volatility. This is known as extension risk. When interest rates decline, borrowers may pay off their fixed income securities sooner than expected. This can reduce the returns of the Fund because the Fund will have to reinvest that money at lower prevailing interest rates. This is known as prepayment risk. The prices of high-yield bonds, unlike those of investment-grade bonds, may fluctuate unpredictably and not necessarily inversely with changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal will also affect the value of these investments.

High-Yield Risk. The Fund's investments in high-yield securities and unrated securities of similar credit quality (commonly known as junk bonds or below investment grade debt) may be subject to greater levels of interest rate, credit and liquidity risk than funds that do not invest in such securities. These securities are considered predominately speculative with respect to the issuer's continuing ability to make principal and interest payments. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce the Fund's ability to sell these securities (liquidity risk). If the issuer of a security is in default with respect to interest or principal payments, the Fund may lose its entire investment.

Issuer Risk. Changes in the financial condition of an issuer of or counterparty to a debt security, changes in specific economic or political conditions that affect a particular type of debt security or issuer, and changes in general economic or political conditions can increase the risk of default by an issuer or counterparty, which can affect a security's or instrument's credit quality or value. Entities providing credit support or a maturity-shortening structure also can be affected by these types of changes. If the structure of a security fails to function as intended, the security could decline in value. Lower-quality debt securities (those of less than investment-grade quality) tend to be particularly sensitive to these changes and involve greater risk of default or price changes due to changes in the credit quality of the issuer.

Liquidity Risk. In certain circumstances, it may be difficult for the Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for the Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Sub-Advisor to dispose of such securities at a fair price at the time the Sub-Advisor believes it is desirable to do so. The Fund's investments in such securities may restrict the Fund's ability to take advantage of other market opportunities and adversely affect the value of the Fund's portfolio holdings. The Fund's investments also may be subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules.

Loan Participation Risk. A loan participation agreement involves the purchase of a share of a loan made by a bank to a company in return for a corresponding share of borrower's principal and interest payments. The

principal credit risk associated with acquiring loan participation interests is the credit risk associated with the underlying corporate borrower. There is also a risk that there may not be a readily available market for loan participation interests and, in some cases, this could result in the Fund disposing of such securities at a substantial discount from face value or holding such securities until maturity.

Management Risk. The Sub-Advisor continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, the achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment. In fact, no matter how good a job the Sub-Advisor does, you could lose money on your investment in the Fund, just as you could with other investments. If the Sub-Advisor is incorrect in its assessment of the income, growth or price realization potential of the Fund's holdings or incorrect in its assessment of general market or economic conditions, then the value of the Fund's shares may decline.

Market Risk. Investments in securities in general are subject to market risks that may cause their prices to fluctuate over time. The Fund's investments may decline in value due to factors affecting securities markets generally, such as real or perceived adverse economic conditions or changes in interest or currency rates, or particular countries, segments, economic sectors, industries or companies within those markets. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of securities and financial instruments in which the Fund invests will cause the NAV of the Fund to fluctuate. Historically, the markets have moved in cycles, and the value of the Fund's securities may fluctuate drastically from day to day. Because of its link to the markets, an investment in the Fund may be more suitable for long-term investors who can bear the risk of short-term principal fluctuations, which at times may be significant.

Trading Risk. Shares of the Fund may trade above or below their NAV. The NAV of shares will fluctuate with changes in the market value of the Fund's holdings. The trading prices of shares will fluctuate in accordance with changes in NAV, as well as market supply and demand. However, given that shares can be created and redeemed only in Creation Units at NAV, the Advisor does not believe that large discounts or premiums to NAV will exist for extended periods of time. Although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. In addition, trading in shares of the Fund may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable.

OTHER INVESTMENT PRACTICES AND STRATEGIES

Temporary Defensive Positions. To respond to adverse market, economic, political or other conditions, the Fund may invest its investment in U.S. government securities, high quality fixed income securities, money market instruments, overnight and fixed-term repurchase agreements, cash and cash equivalents with maturities of one year or less. While the Fund is in a defensive position, the Fund may not achieve its investment objective.

Please see the Fund's Statement of Additional Information ("SAI") for a more complete list of portfolio investment strategies, permitted investments and related risks.

PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the disclosure of Fund portfolio securities is available (i) in the SAI and (ii) on the Trust's website at www.advisorshares.com. The Fund's portfolio holdings will be disclosed on the Trust's website daily after the close of trading on the Exchange and prior to the opening of trading on the Exchange the following day.

MANAGEMENT OF THE FUND

INVESTMENT ADVISOR

AdvisorShares Investments, LLC, located at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814, serves as investment advisor of the Fund. As of September 30, 2016, the Advisor had approximately \$1.17 billion in assets under management.

The Advisor continuously reviews, supervises, and administers the Fund's investment program. In particular, the Advisor provides investment and operational oversight of the Sub-Advisor. The Board supervises the Advisor and establishes policies that the Advisor must follow in its day-to-day management activities. Pursuant to an investment advisory agreement between the Trust and the Advisor, the Advisor is entitled to receive an annual advisory fee of 1.10% based on the average daily net assets of the Fund. The investment advisory agreement may be terminated (i) by the Board for any reason at any time, (ii) with respect to the Fund, upon the affirmative vote of a majority of the outstanding voting securities of the Fund, or (iii) by the Advisor upon thirty (30) days' prior written notice to the Trust.

The Advisor bears all of its own costs associated with providing these advisory services and the expenses of the members of the Board who are affiliated with the Advisor. The Advisor may make payments from its own resources to broker-dealers and other financial institutions in connection with the sale of Fund shares.

The Advisor has contractually agreed to reduce its fees and/or reimburse expenses in order to keep net expenses (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 1.35% of the Fund's average daily net assets for at least one year from the date of this Prospectus. The expense limitation agreement may be terminated, without payment of any penalty, (i) by the Trust for any reason and at any time and (ii) by the Advisor for any reason upon ninety (90) days' prior written notice to the Trust, such termination to be effective as of the close of business on the last day of the then-current one-year period. If at any point it becomes unnecessary for the Advisor to reduce fees or make expense reimbursements, the Board may permit the Advisor to retain the difference between the Fund's total annual operating expenses and 1.35% to recapture all or a portion of its prior fee reductions or expense reimbursements made during the preceding three-year period.

Subject to shareholder approval, the Advisor will have the right, pursuant to an exemptive order from the SEC and subject to certain conditions, to hire a new unaffiliated sub-advisor or materially amend the terms of an agreement with an unaffiliated sub-advisor when the Board and the Advisor believe that a change would benefit the Fund. The Prospectus will be supplemented when such shareholder approval is obtained.

A discussion regarding the basis for the Board's most recent approval of the Fund's investment advisory agreement is available in the Trust's Annual Report to Shareholders dated June 30, 2016.

INVESTMENT SUB-ADVISOR

Peritus I Asset Management, LLC (commonly referred to as "Peritus Asset Management"), located at 1216 State Street, 4th Floor, Santa Barbara, California 93101, serves as investment sub-advisor to the Fund. The Sub-Advisor is responsible for selecting the Fund's investments in accordance with the Fund's investment objective, policies and restrictions. The Sub-Advisor serves as investment advisor to a variety of individual and institutional investor accounts and, as of September 30, 2016, managed approximately \$207 million in assets.

A discussion regarding the basis for the Board's most recent approval of the Fund's investment sub-advisory agreement is available in the Trust's Annual Report to Shareholders dated June 30, 2016.

PORTFOLIO MANAGERS

Mr. Gramatovich, Mr. Heller and Mr. Flaherty are the portfolio managers primarily responsible for the day-to-day management of the Fund. Their biographical information is included below.

In 1995, Mr. Gramatovich and Mr. Heller co-founded Peritus Asset Management, Inc. In April 2002, the assets of Peritus Asset Management, Inc. were acquired and the name was changed to Core Wealth Management, LLC. Mr. Gramatovich and Mr. Heller remained at Core Wealth Management, until leaving to form Peritus I Asset Management, LLC in May 2004.

Tim Gramatovich, Chief Investment Officer - As the Chief Investment Officer of the Sub-Advisor, Mr. Gramatovich chairs the investment committee and is responsible for analyzing and monitoring existing and prospective investments, as well as developing investment strategies. Prior to the founding of the Sub-Advisor, Mr. Gramatovich was a portfolio manager with Smith Barney's Asset Management Division in Los Angeles, where he managed high-yield portfolios for high net worth individuals and institutions. Prior to joining Smith Barney, he was a senior vice president with Aegis Asset Management Inc. in Los Angeles, managing high-yield portfolios. Mr. Gramatovich began his career with Drexel Burnham Lambert in 1984, working in both New York and Los Angeles, assisting in the development and marketing of high-yield corporate cash management products. Mr. Gramatovich is a Chartered Financial Analyst ("CFA") charter holder and a member of the CFA Institute. Mr. Gramatovich serves and advises several local charitable groups. He is a graduate of the New York Institute of Finance.

Ron Heller, Chief Executive Officer and Senior Portfolio Manager - As Senior Portfolio Manager of the Sub-Advisor, he oversees portfolio management and trading activities. Mr. Heller's role in the oversight of portfolio execution is critical to the Sub-Advisor's strategy. Additionally, Mr. Heller manages the dealer and custodial relationships. Mr. Heller began his career in leveraged finance in 1993 with Smith Barney. Prior to Mr. Heller's investment career, he had a seven-year career in the National Football League with San Francisco, Atlanta and Seattle, retiring in 1993. Mr. Heller attended Oregon State University, majoring in Kinesiology. Mr. Heller currently holds his FINRA Series 7.

Dave Flaherty, Senior Portfolio Manager - Mr. Flaherty joined the Sub-Advisor in November of 2004 and is responsible for assisting with the oversight of the Sub-Advisor's portfolio management and trading activities. Along with Mr. Heller, Mr. Flaherty and the trading group facilitate the sourcing of investment product assuring that the Sub-Advisor's strategy is properly executed in the portfolios and that the clients received the best execution with all trades. Mr. Flaherty graduated from Westmont College in 2003, where he majored in Economics and Business.

Additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of securities in the Fund is available in the SAI.

OTHER SERVICE PROVIDERS

Forside Fund Services, LLC (the "Distributor") is the principal underwriter and distributor of the Fund's shares. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The Distributor is not affiliated with the Advisor, Sub-Advisor, The Bank of New York Mellon or any of their respective affiliates.

The Bank of New York Mellon, located at 101 Barclay Street, New York, New York 10286, serves as the administrator, custodian, transfer agent and fund accounting agent for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, located at 1818 Market Street, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

SHAREHOLDER INFORMATION

CALCULATING NET ASSET VALUE

The Fund calculates NAV by (i) taking the current market value of its total assets, (ii) subtracting any liabilities, and (iii) dividing that amount by the total number of shares owned by shareholders.

The Fund calculates NAV once each business day as of the regularly scheduled close of normal trading on The New York Stock Exchange, LLC (the “NYSE”) (normally 4:00 p.m. Eastern Time). The NYSE is typically closed on weekends and most national holidays.

In calculating NAV, the Fund generally values its portfolio investments at market prices. If market prices are unavailable or the Fund thinks that they are unreliable, or when the value of a security has been materially affected by events occurring after the relevant market closes, the Fund will price those securities at fair value as determined in good faith using methods approved by the Board.

The use of fair valuation in pricing a security involves the consideration of a number of subjective factors and, therefore, is susceptible to the unavoidable risk that the valuation may be higher or lower than the price at which the security might actually trade if a reliable market price were readily available.

More information about the valuation of the Fund’s holdings can be found in the SAI.

SHARE TRADING PRICES

The price of the Fund’s shares is based on market price, which may differ from the Fund’s daily NAV per share and can be affected by market forces of supply and demand, economic conditions and other factors. The Exchange intends to disseminate the approximate value of the portfolio underlying a share of the Fund every fifteen seconds. This approximate value should not be viewed as a “real-time” update of the NAV per share of the Fund because the approximate value may not be calculated in the same manner as the NAV per share, which is computed once a day. The Fund is not involved in, or responsible for, the calculation or dissemination of such values and makes no warranty as to their accuracy.

PREMIUM/DISCOUNT INFORMATION

Information showing the number of days that the market price of the Fund’s shares was greater than the Fund’s NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund’s NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund’s website at www.advisorshares.com.

DIVIDENDS AND DISTRIBUTIONS

The Fund pays out dividends and distributes its net capital gains, if any, to shareholders at least annually.

ACTIVE INVESTORS AND MARKET TIMING

Shares of the Fund are listed for trading on the Exchange, which allows retail investors to purchase and sell individual shares at market prices throughout the trading day similar to other publicly traded securities. Because these secondary market trades do not involve the Fund directly, it is unlikely that secondary market trading would cause any harmful effects of market timing for example: dilution, disruption of portfolio management, increases in the Fund’s trading costs or realization of capital gains. The Board has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the Fund’s shares because the Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of a Participant Agreement between the Distributor and an Authorized Participant, principally in exchange for a basket of securities that mirrors the composition of the Fund’s portfolio and a specified amount of cash. Direct trading by Authorized Participants is critical to ensuring that the Fund’s shares trade at or close to NAV. The Fund also imposes transaction fees on such Creation Unit transactions that are designed to offset the Fund’s transfer and other transaction costs associated with the issuance and redemption of the Creation Unit shares.

BOOK-ENTRY

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. DTC, or its nominee, is the record owner of all outstanding shares of the Fund and is recognized as the owner of all shares.

Investors owning shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants (*e.g.*, broker-dealers, banks, trust companies, or clearing companies). These procedures are the same as those that apply to any stocks that you hold in book-entry or “street name” through your brokerage account.

INVESTING IN THE FUND

For more information on how to buy and sell shares of the Fund, call the Trust at 877.843.3831 or visit the Fund’s website at www.advisorshares.com.

DISTRIBUTION PLAN

The Fund has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services. The Fund will pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of its average daily net assets. If a service provider provides distribution services, the Distributor will pay the service provider out of its distribution fees.

No distribution fees are currently charged to the Fund; there are no plans to impose distribution fees, and no distribution fees will be charged for at least one year from the date of this Prospectus. However, to the extent distribution fees are charged in the future, because the Fund would pay these fees out of assets on an ongoing basis, over time these fees may cost you more than other types of sales charges and would increase the cost of your investment. At such time as distribution fees are charged, the Fund will notify investors by adding disclosure to the Fund’s website and in the Fund’s Prospectus. Any distribution fees will be approved by the Board.

ADDITIONAL TAX INFORMATION

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-advantaged account. More information about taxes is located in the SAI. You are urged to consult your tax advisor regarding specific questions as to U.S. federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for U.S. federal income tax purposes and intends to qualify for the special tax treatment afforded to regulated investment companies (“RICs”) under the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). As long as the Fund qualifies for treatment as a RIC, it pays no federal income tax on the earnings it timely distributes to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Tax Status of Distributions

- The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains income.

- The Fund's distributions from income and net short-term capital gains will generally be taxed to you as ordinary income or qualified dividend income. For non-corporate shareholders, dividends reported by the Fund as qualified dividend income are generally eligible for reduced tax rates applicable to long-term capital gains, provided holding period and other requirements are met. Qualified dividend income generally is income derived from dividends paid by U.S. corporations or certain foreign corporations. In general, dividends received by the Fund from another ETF taxable as a RIC may be distributed and reported as qualified dividend income by the Fund to the extent the dividend distributions are distributed and reported as qualified dividend income by the other ETF. The Fund's trading strategies may limit its ability to distribute dividends eligible for treatment as qualified dividend income.
- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund's trading strategies may limit its ability to distribute dividends eligible for the dividends-received deduction for corporate shareholders.
- Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) that you receive from the Fund generally are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are taxed to non-corporate shareholders at reduced tax rates.
- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.
- Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.
- Shortly after the close of each calendar year, the Fund will inform you of the amount of your ordinary income dividends, qualified dividend income, and net capital gain distributions received from the Fund.
- You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of shares is generally treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less is treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares.

Medicare Tax

U.S. individuals with income exceeding certain thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," including interest, dividends, and certain capital gains (generally, including capital gain distributions and capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors

If you are not a citizen or permanent resident of the United States, the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. The 30% withholding tax generally will not apply to distributions of net capital gain. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally

be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax.

Distributions paid after June 30, 2014 (or, in certain cases, after later dates) and sale and redemption proceeds and certain capital gain dividends paid after December 31, 2018 to a shareholder that is a foreign entity may be subject to withholding tax at a 30% rate unless certain certification requirements regarding persons investing in or holding accounts with you are met.

Backup Withholding

The Fund will be required in certain cases to withhold (as “backup withholding”) on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is 28%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (a) the sum of the market value of the Creation Units at the time and any net cash received, and (b) the sum of the purchaser’s aggregate basis in the securities surrendered and any net cash paid for the Creation Units. An Authorized Participant who redeems Creation Units will generally recognize a gain or loss equal to the difference between (x) the sum of the redeemer’s basis in the Creation Units and any net cash paid, and (y) the sum of the aggregate market value of the securities received and any net cash received. The Internal Revenue Service, however, may assert that a loss that is realized, by an Authorized Participant that does not mark-to-market its holdings, upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position.

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Internal Revenue Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Fund shares you purchased or redeemed and at what price

The foregoing discussion summarizes some of the consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences to you of an investment in the Fund under all tax laws applicable to you.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund’s financial performance since the Fund commenced operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost, on an investment in the Fund

(assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Tait, Weller & Baker LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's Annual Report, which is available upon request.
